Venu Madhavi Yellapu   Email**: yellapumadhavi33@gmail.com**
QA Engineer   Mobile: +91-8088395054

Career Objective:

To utilize my skills in software testing and quality assurance to ensure the delivery of reliable, high-quality web and e-commerce platforms, while contributing to organizational growth and continuously enhancing my technical and analytical expertise.

Summary:
- Around **3 years of IT experience** including software testing, support, and documentation.
- Skilled in **manual testing of web applications and e-commerce platforms**.
- Hands-on experience in **functional, UI, and end-to-end testing** across multiple browsers and devices.
- Experienced in **bug tracking and documentation using Jira**.
- Basic understanding of **API testing using Postman** and **HTML/CSS** for front-end verification.
- Strong analytical, problem-solving, and communication skills with attention to detail.
-

Technical Skills:
    Testing Tools: Jira, Postman, Browser Developer Tools
    Testing Types: Functional Testing, Regression Testing, UI Testing, End-to-End Testing, Cross-Browser Testing
    Methodologies: Agile, Scrum
    Version Control: Git, GitHub
    Languages (Basics): HTML, CSS, JavaScript
    Project Tools: Microsoft Dynamics CRM, SAP ECC (Basic Exposure)
    IDE / Editors: Visual Studio Code
    Operating Systems: Windows, macOS

Projects:

RetailEdge – E-Commerce Platform
Technologies**:** Web and Mobile Application, Postman API
Role: Manual Tester – **Team Size:** 05

Description:
Tested the RetailEdge e-commerce platform to ensure smooth user experience and reliable functionality across multiple regions. Conducted cross-browser testing, logged issues in Jira, and collaborated with developers for quick defect resolution. Supported Product Owners in acceptance testing and release readiness.

Responsibilities :
• Performed functional, UI, and regression testing across multiple browsers and devices.
• Executed predefined test cases and test plans ensuring end-to-end validation.
• Created detailed bug reports and logs in Jira for effective tracking.
• Collaborated with developers and Product Owners for release acceptance.
• Assisted Test Manager in creating and maintaining test cases.

VisiQ – Visitor Management System
Technologies: Web Application, Postman, Browser Developer Tools
Role: QA Engineer – **Team Size:** 06

Description:
VisiQ is a visitor management system with face authentication and real-time tracking. Validated workflows such as visitor registration, blacklist management, and PDF report generation through extensive manual testing.

Responsibilities :
• Conducted **UI, functional, and integration testing** of visitor modules.
• Verified **form validations, data integrity, and PDF generation**.
• Logged and tracked defects using **Jira**, collaborating with developers for fixes.
• Ensured responsiveness and consistency across browsers.

Godenty - Dental Healthcare Platform
Technologies: Web, Mobile, Postman, Browser Developer Tools
Role: Manual Tester – **Team Size:** 05

Description:
Tested the Godenty platform to ensure a smooth and high-quality user experience across web and mobile devices. Performed end-to-end testing, API validations, and UI verification. Logged and tracked issues in Jira and collaborated with developers to ensure timely fixes and smooth releases.

Responsibilities :
Conducted manual testing of web and mobile applications to verify functionality and usability.
• Performed API testing using Postman to validate data flow and integration.
• Created and executed test cases based on business requirements.
• Identified, documented, and tracked defects using Jira.
